ITS leads

Why the patented **Ultramist** from Intelligent Tanning Systems is the **BEST** sunless tanning machine you can buy...

THE MOST SPRAY NOZZLES

Four spray nozzles, more than double the number of other machines for the absolute best, smoothest tan WITHOUT having to teach your clients how to do the *Macarena*, the *Hokey Pokey* or *Walk Like an Egyptian*.

INTEGRATED SLIDING DOOR

Our integrated sliding door means that the Ultramist takes up less space, and it keeps the solution on your customers instead of on your salon walls.

LINEAR MOTION TECHNOLOGY

Linear motion HPLV spray nozzles allow you to choose the solution you like from the vendor YOU choose. No more being forced to buy tanning solution at exorbitant prices.

THE BREATHE EASY SYSTEM

Breathe Easy technology offers a safe, comfortable tanning experience, and eliminates the need for nose filters.

AUTOMATIC WASHDOWN

You'll never waste time or money manually cleaning the Ultramist. At the push of a button, it's 100% self-cleaning.

ITS USES THE BEST MATERIALS IN THE INDUSTRY

Marine-grade components and stainless steel that WILL NOT be stained, rusted or corroded, unlike other systems. *Don't let the brown get you down!*

INDIVIDUALIZED COMPONENTS

You can install the Ultramist yourself in less than an hour, and individualized components allow for easy maintenance.

EASY REPLACEMENT

All crucial components of the Ultramist are self-contained in one box that can be easily disconnected and replaced, reducing downtime. LED indicators make troubleshooting a breeze.

REMOTE POWER SUPPLY

Unlike other systems, the remote 12V DC Power Supply is located away from the Ultramist to eliminate the risk of electrical shock.

WATERPROOF CONNECTIONS

The Ultramist uses waterproof connections and higher gauge wiring than many other sunless tanning machines.

INTEGRATED TAN COUNTER

The tan counter lets you know exactly how many tans your machine has given.
